Our Vision

To constantly grow with the changing technologies
keeping efficiency and uniqueness our topmost
priority.

Our Mission

We aim to provide a secure decentralized platform
with the use of blocks to help businesses run safer
and be more competitive.

Our Values

Innovation:
Innovation is the cornerstone on which we build our success and future moves.

Teamwork:
We value each member of our team and believe that only with dedication and team spirit we can overcome every challenge.

Integrity:
Integrity is the core value that guides all our actions and decisions.

Commitment:
We are committed to being the best we can be. In order to achieve this, we place the customer at the center of everything we do.

Why

Technical Expertise:

We excel in extensive blockchain development which helps us cater complex business needs and enables us to provide maximum data security for our clients.

Constant Innovation:

Our cycle of innovation continues to grow through our well maintained inhouse R&D Lab, resulting in newer products with every new change in the market.

Smart Planning:

We provide corporate models which are flexible to update and adjust to requirements and are also cost efficient helping budget management.

Fostering Relationships :

We believes in interaction with its clients that is mutually empathetic and mutually empowering.

Our Offerings

We provide some of the most efficient and effective solutions to ease out business processes and to help firms stand strong in handling of data.

Public Blockchain (Ethereum):

Our Ethereum Experts are skilled in Efficient & Gas optimized Smart Contract Development.

Blockchain Consultancy:

We provide critical assessment on business cases through well-thought analysis providing blockchain expert solutions.

Digital Marketing (SEO, SMM, SEM):

Our marketing team helps you strategize your online business processes to attract more visitors to your online platforms driving effective sales from them.

UI/UX Designing:

Our website designers work with unique combinations providing designs that stand out and are well accommodating to the users' needs.

Frontend Designing (React):

The frontend team ensures a pleasant experience for the clients keeping websites creative and precise using the latest programming languages such as React.

Backend (Node JS):

Our backend programmers handle work efficiently using different programming languages including Java, C# and Node-JS

Major Business Areas

There are three major business areas

1. Blockchain Development Services
2. Blockchain Education & Training
3. Entrepreneurial Products & Programs

1. Blockchain Development Services:

provides development services in the following domains.

1. Blockchain Mobile, Desktop & Web Applications
2. Ethereum Decentralized Applications (DApps)
3. Enterprise-grade Private blockchain solutions using Hyperledger Fabric & Sawtooth
4. Cryptocurrency Wallet Development
5. AI Powered Blockchain Application services
6. IoT Integrated Blockchain based solutions
7. Decentralized Finance (DeFi) Development services

Industries:

- E-commerce
- Education & Healthcare
- Supply Chain & Logistics
- Automotive & Aviation
- Insurance & Claim Management
- Real Estate & Construction
- Digital Identity & Rights Management
- Agriculture Systems
- Transportation & Tourism

Electronic voting system built using firebase, Ethereum blockchain and react js. It allows users to login first then connect wallet and give vote. It also has admin and owner pages.

Land Registration & Ownership Tracking System

The aim of this product is to use the power of blockchain to provide traceability of ownership of a real estate asset right from the very first owner registration. All the relevant details along with complete history are made accessible on a simple QR code scan. The same functionality can be achieved using a mobile app.

A blockchain system which provides traceability of ownership of the vehicle right from the very first owner registration. Anybody can provide the VIN number of a vehicle to view all relevant details and history. Additionally, a mobile app provides another interface to easily access the required information.

Vehicle Ownership Tracking System

Our Portfolio

We have created a number of projects that range from full scale web apps to simple website designs. Check out some of our work to get an idea of what we can do.

Staking and Farming DApps:

Following are proof of stake based blockchain systems, where you can lend crypto assets in order to generate high returns. You can check these out at

- <https://yearfi.finance>

- <https://etgproject.org>
- <https://stakewise.org>
- <https://the8020.ch>

Ethereum Document Verification System

A system that can make sure that nobody is able to edit the digital document once it has been uploaded by the institute on the blockchain network. Once you start using a digital notary for verification with time stamping on an open ledger which can never be tampered, or altered hence providing complete transparency. It has been built using IPFS, Ethereum, react js, react native, Ropsten, you can check it out at <https://edveri.surge.sh>.

Full-Stack Serverless Blockchain e-Voting System

Electronic voting system built using rebase, Ethereum blockchain and react js. It allows users to login first then connect wallet and give vote. It also has admin and owner pages

Land Registration & Ownership Tracking System

The aim of this product is to use the power of blockchain to provide traceability of ownership of a real estate asset right from the very first owner registration. All the relevant details along with complete history are made accessible on a simple QR code scan. The same functionality can be achieved using a mobile app
